

Portal API notification

Patients of Milford Regional Medical Center are able to connect to 3rd party applications (apps) to retrieve parts of their health record for their own personal use. Examples of data that can be pulled into an app include lab results, allergies, and medications.

In order to authorize an app to retrieve your health data, follow these steps:

1. Make sure you have a MyHealth (patient portal) account created for Milford Regional Medical Center
2. You will need your log in credentials for the authentication process.
3. Access the application on your personal device. Carefully review the apps terms and conditions.
4. The app may ask you to select your healthcare provider from a list. Select the healthcare provider and complete the steps for the app.
5. In most cases, you will be redirected to the MyHealth login screen. Enter your credentials and continue.
6. You may see a page with detail about the app. These details come from the app developer and includes whether it distributes your data to other parties and whether you are able to delete or see records of the data the app collects. Review this information carefully and determine if you want the app to have access to your health information. If you would like to allow the app access to your data, check the "I have read the statements above" box and then click "Allow Access".
7. For questions, please call the Medical Records department during business hours at 508 422 2487.
